

Prime Minister David Cameron Officially Opens JSP's new Industrial Safety Helmet Manufacturing Line.

Friday 14th October
Worsham Mill, Minster Lovell, Oxford

Prime Minister David Cameron officially opened JSP's new state-of-the-art industrial safety helmet manufacturing facility.

JSP has invested over £3m to create the world's most advanced industrial safety helmet manufacturing line with capacity of over 4m helmets per year. JSP's new Evolution range of industrial safety helmets will be sold in over 90 countries around the globe.

The new range provides the platform for growth over the next 5-10 years and future expansion of its team including the planned introduction of new apprenticeship and graduate trainee schemes in 2012. The new line also sees the reintroduction of the BSI kitemark scheme and in conjunction with the British Standards Institute, the launch of a new risk based selection approach across the relevant EN standards. JSP's in-house research and development team have developed the highest performing and most comfortable range of industrial head protection on the market - including the EvoLite which at only 285g is the lightest on the market and the Mk8 Evolution which meeting EN14052 is the strongest industrial helmet in the world.
